

FIELD CARE OF SPECIMENS

Fish

Always take good close up pictures as soon as possible, never remove gills, and do not gut the fish. Clean the mouth and gills thoroughly with water. Wrap the fish in a water soaked towel, lay flat on a heavy cardboard the same length as the fish. Cover it with heavy plastic and seal it. FREEZE AND DELIVER TO YOUR LICENSED TAXIDERMIST.

Deer-Bear-Small Mammals

Cut as little as possible on full body mounts. On shoulder mounts - cut around body behind the front legs. Roll the skin down to neck leaving about 3 inches of neck. Cut the neck at this point, wrap in heavy plastic bag, seal and freeze, or take to your Taxidermist A.S.A.P.

Small mammals - Do NOT field dress animal, instead bring in whole mammal.

NOTE -Under no circumstances should any hide be hung or tied with rope! Doing so will damage the animals hair.

TERMS & CONDITIONS

50% deposit required on all work prior to starting work. All work left over 30 days after notice of completion may become property of Trails End Taxidermy Studio. Storage fees may apply 30 days after notice of completion. Personal Checks will ONLY be accepted for initial 50% deposit, outstanding balance to be paid cash/money order only.

Please be aware, all tanning/prep work for animals are completed by outside contractor(s). Many factors can ruin a hide, including the tanning process, field care, time of year, animal health, etc. Trails End Taxidermy Studio will NOT be held responsible for any issues associated with the tanning process.

All animals involved with vehicle collisions must be inspected prior to work and may be subject to non-standard pricing.
